
$L = 2{,}526$
non gold sopra soglia, gold sotto

$L = 1{,}473$
tutte dal lato giusto

$$L_{sup} = \underbrace{\log\left(1 + \sum_{i \notin G} \omega_i \, e^{\,s_i - s_\star}\right)}_{\text{spinge giù le non gold sopra } s_\star} + \underbrace{\log\left(1 + \sum_{j \in G} e^{\,s_\star - s_j}\right)}_{\text{spinge su le gold sotto } s_\star} \approx \left[\max_{i \notin G} s_i - s_\star\right]_+ + \left[s_\star - \min_{j \in G} s_j\right]_+$$
